

Our vendor for Airco/Olsen Condensers (CI3181VAR to CI3601VAR) and Heat Pumps (HI3181VAR to CI3601VAR) has changed the color of the jacket supplied with the unit. The new color is grey/green identified as Dark Green (figure 1). The existing color is white/beige identified as White (figure 2). For the 2008 season ECR will have a mixture of both colors during this transition.

How do I identify the color of the unit when it is in the box?

The color of the unit is printed on all four sides of the box, circled in **red on the images below**.

Figure 1

Figure 2

Are there any other changes to the unit?

No, the only change is the color of the unit. All other features and components remain unchanged.

When will the new color units start shipping?

Dark Green units have been received and will ship as required.

I have additional questions?
